Senior Underwriter, Energy & Construction, Belgium & Luxemburg, Mediterranean and Africa Region

Job Role/Purpose

Within the Energy & Construction Underwriting Department of Allianz Global Corporate & Specialty, Mediterranean and Africa region, you will work as an underwriter in charge of the study and implementation of Energy, Engineering and Construction insurance solutions, with a particular focus on Construction and Erection All Risks aspects. You are based in Antwerp and report to the Country LOB Head.

Your clients will be large broker firms and major players in the Belgian, Luxemburg and European Engineering segment.

Your role will be to develop, negotiate and underwrite insurance programs on behalf of major local and international clients. You will ensure the development and profitability of your portfolio as well as the follow-up of broker and client relationships in close coordination with the sales team, engineering services, claims and operations departments.

Key Responsibilities

In this role you will....

- Underwrite new and renewal business to meet profitability targets
- Underwrite in line with the Energy & Construction governance framework e.g. Underwriting Authorities, Underwriting Guidelines and Functional Rules
- Ensure all Legal & Compliance rules and regulations are met in due time
- Issue accurate policy documentation on time and file according to AGCS standards
- Manage your portfolio in close collaboration with the local and regional team
- Contribute to the development and execution of regional underwriting strategy
- Create and maintain positive relationships with key producers and clients and other relevant stakeholders
- Follow closely the KPI’s defined with your manager

Key Requirements/Skills/Experience

- Preferably, you have a degree either in Engineering/Construction, economics, or other appropriate discipline
- You have at least 7 years’ experience underwriting profitable business in the Engineering & Construction segment of large corporate international insurance
- You have a strong network in the Belgian market with a good knowledge of the E&C landscape
- You have a good understanding of the legal and regulatory environment
- Strong communication skills
- Capable of leveraging data and analytics to make business more efficient and effective
- You can design, develop and implement consistent, robust wordings for contracts.
- Fluent in Dutch, English and preferably also in French.
